

From your save to the editor

Getting started: connect, find a player and open their profile. Screenshots use the Spanish interface.

1. Open Football Manager 26 and load your save. **2.** Open Touchline Forge 26. If FM is not detected, click **Reconnect (Reconectar)**. **3.** Once Football Manager is connected, click **Load save (Cargar partida)** and wait for the players to appear.

Find a player

Example: type Pedri in the name filter (NOMBRE) and open the Barcelona result.

Three areas

Profile (Perfil) contains attributes and personal details. **Contract (Contrato)** shows the current agreement. **Transfers and loans** appears as Traspasos y cesiones.

CA, RCA and PA

CA: current ability.
PA: potential ability.
RCA: recommended current ability calculated by FM; this value is read-only.

More sections

Use the drop-down at the top right of Profile to access other groups of data. Use the scroll bars to see content outside the visible area.

Edit an attribute

Values are applied to the open save when you confirm the field.

Edita un valor y confirma con Enter o saliendo del campo.

1. Choose a value

In **Profile** → **Outfield attributes** (Perfil → Atributos de campo), click the number for the attribute you want to edit, such as **Passing (Pases)**.

2. Confirm

Enter a value from **1 to 20** and press **Enter**. Leaving the field also applies it. Read the result shown by the editor.

3. Check the result

The editor reads the value back. Changing attributes may recalculate CA. Controls with their own **Apply (Aplicar)** button are confirmed with that button.

View and edit a contract

Wages in the editor are weekly, and monetary amounts use the currency selected in FM.

Edita un valor y confirma con Enter o saliendo del campo.

Current contract

Open **Contract (Contrato)** to view wages, loyalty payments and dates. Confirm editable fields with Enter or by leaving the field.

Status and conditions

To change employment status, choose an option and click **Apply status (Aplicar estado)**. Expand a bonus or clause to see its controls.

Add a condition

Click **Add condition (Añadir condición)**, select an available type, fill in the details and confirm using the form control. Each condition has its own fields.

Reuse attributes with a template

A template stores attributes, not an entire player or their contract.

The screenshot shows the 'Perfil de jugador' (Player Profile) for Pedri in Touchline Forge 26. The interface is in Spanish. At the top, there's a header with the player's name, club (Barcelona), and position (P). Below this, there are tabs for 'Perfil', 'Contrato', and 'Traspasos y cesiones'. The 'Contrato' tab is active, showing contract details like 'CONTRATO ACTUAL', 'SUELDO SEMANAL', and 'FIDELIDAD SEMANAL'. A modal window titled 'Importar / exportar atributos' is open, displaying instructions on how to use templates to save or compare player attributes. The modal includes buttons for 'Exportar atributos' and 'Importar atributos'. The background shows contract conditions like 'Prima por partido' and 'Prima por gol'.

Export

On the source player, open **Import / export attributes** (Importar / exportar atributos). Click **Export attributes** and choose where to save the **.tfa.json** file.

Import

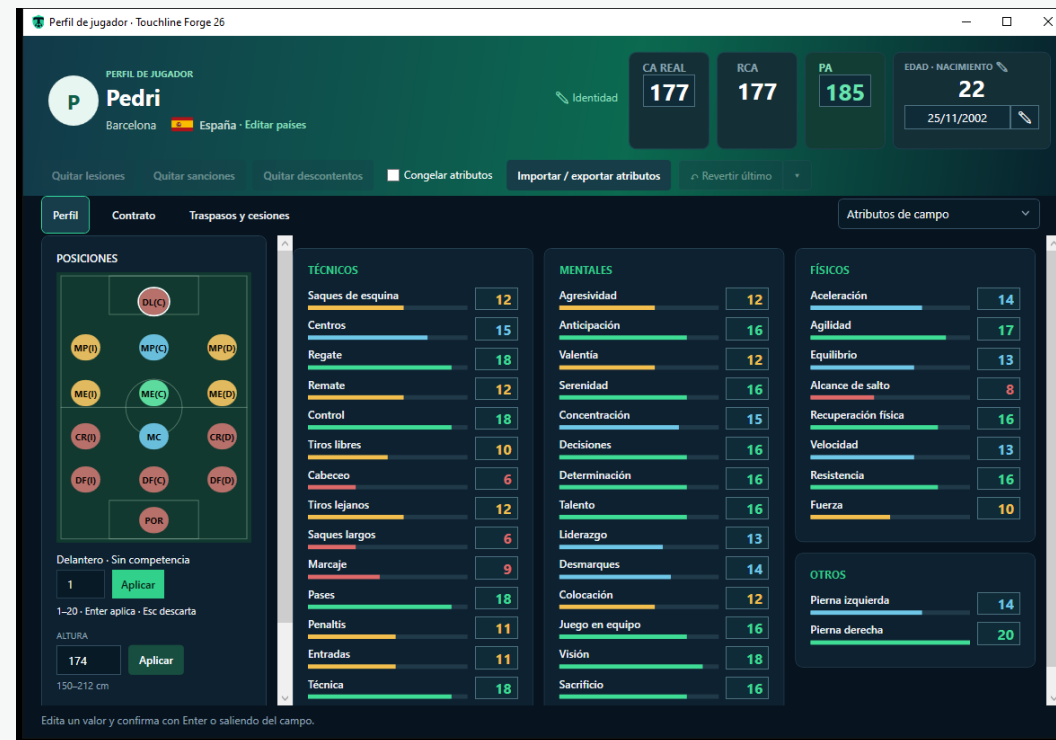

Open the destination player and the same panel. Click **Import attributes**, choose the file and review the comparison before applying it.

Apply to player

This button appears when a template with changes is loaded. Check the destination player first. Templates exclude CA/PA, identity, positions and contract data.

Check, undo and save

Live editing and saving your game are separate steps.

Check in FM

Return to the game and open the player profile. If the old value is still shown, leave the profile and open it again. In the editor, **Refresh data (Actualizar datos)** reads the save again.

Undo an edit

Undo last (Revertir último) reverses the last supported change. Its arrow offers **Undo all (Revertir todos)**. The history belongs to the open profile and is lost when you close it.

Keep your changes

Save your game in **Football Manager** to keep the changes. Touchline Forge has no global Save button. Club moves and some immediate actions cannot be undone.

Other profile controls

A quick reference to help you navigate the editor.

Identity and birth date

Click the name or **Identity (Identidad)** to open personal details. **Edit countries (Editar países)** opens the corresponding controls. Change the birth date using the age card.

Languages and nationalities

Use the Profile section selector to open languages and nationalities. Search for an option and select a result from the list. Language proficiency ranges from **0 to 10**.

Positions and height

Select a position on the pitch, enter its proficiency and click **Apply (Aplicar)**. Height also has an Apply button. Follow the ranges displayed by each control.

Transfers and loans

Open the transfers and loans tab, select the destination club and complete the operation details. For a transfer, enter the fee and date; for a loan, enter the end date. Review the summary before confirming.

Scope of club moves

Club moves have no general undo. Transfer financial reconciliation is still under review, and execution of scheduled transfers on the due date has not been verified. Do not treat these as reversible edits.

Monetary amounts

Wages and contributions are weekly. If you change the currency in FM, return to the editor to refresh the amounts; unsaved monetary entries may be cleared.

Quick actions

Freeze attributes (Congelar atributos) changes that state when checked. Unchecking it does not restore previous values. Removing injuries, bans or unhappiness takes effect immediately and is outside general undo.

If the list will not load

Check that your save is loaded in FM. Click **Reconnect (Reconectar)**, then **Load save (Cargar partida)**. If you switched saves, reload the data before working.

Disabled options

The staff, clubs, competitions and countries sections in the sidebar are not available yet. You do not need to activate them to edit players.
